In January 2007, Autodesk announced that it would be phasing out the original AutoCAD Activation Code development team and developing a unified platform for both Autodesk and non-Autodesk software. In 2009, Autodesk was the number one provider of software used for the design of industrial and manufacturing products, and was the second-largest software publisher, ahead of Microsoft's Office division. History AutoCAD was originally developed by a group of software engineers at Autodesk's Elmsford, New York development center. In 1982, two engineers at Autodesk, William K. Wood and Lynn Hughes, were assigned to work on developing a Windows-based desktop CAD system for the Apple II microcomputer. Hughes wrote the first version of AutoCAD and Wood wrote the first full-blown application, Drafting and Annotating. AutoCAD Classic was introduced on March 1, 1984, and, according to Autodesk, was the first commercially available "true" CAD system available to the general public. The full price was US$4,500, though some dealers offered their own discounts. The first ships shipped on December 15, 1985. It was available for the Apple II, IBM PC, and MS-DOS systems, and in several languages. In 1985, Autodesk released AutoCAD LT for Apple II, which allowed it to be used by hobbyists. It was not as widely adopted as AutoCAD Classic, and did not include features such as parametric drawing or three-dimensional (3D) modeling. In November 1987, Autodesk was acquired by ATC Inc. (now part of Acer Inc.) In September 1993, ATC released AutoCAD 2000, which added parametric and three-dimensional features. On January 1, 2007, Autodesk announced that they would be phasing out the original AutoCAD development team, developing a unified platform for both AutoCAD and non-AutoCAD software. In the same month, Autodesk released AutoCAD 2008, which replaced the 2D/3D-CAD and drafting applications AutoCAD LT and AutoCAD 2007 respectively, with AutoCAD 2009 included as a new application. Autodesk continues to develop AutoCAD on all the major platforms (Windows, Macintosh, and Linux). A new major release, AutoCAD 2010, was released in October 2009. On August 8, 2018, Autodesk announced

The UN secretary general called for a strong and impartial peacekeeping force to help the troubled Central African Republic, where armed groups have been fighting since March 2013. "A peacekeeping operation should be deployed in Central African Republic and an assessment should be made of the security conditions, including the need for a new neutral force," UN Secretary-General Ban Ki-moon told the UN Security Council. Ban called on the Council to consider "a comprehensive and durable peacekeeping operation with a robust mandate." French and African military helicopters evacuated 30 sick and injured Central Africans from the besieged airport of Bangui, the capital of Central African Republic, to a nearby country for medical treatment. Meanwhile, a military court in Central African Republic has sent to pre-trial detention four army officers in connection with the killing of at least 13 Central Africans last month during protests demanding President Charles-Taylor's resignation. They were charged with "aggression against a population, genocide, murder and conspiracy against a population." The court said the men face 10 to 20 years in prison. "We are deeply concerned by reports that dozens of people have been killed in the last few days, and by the detention of four officers by the military court in Bangui," said UN
