Multiple Autodesk License Plans/Plans Autodesk's CAD software is available for purchase on a per-seat basis, and for purchase as a single-user license. Autodesk offers two types of yearly licenses, a Personal License and a Commercial License. A personal license allows one person to use CAD software for personal, non-commercial purposes. A commercial license allows an unlimited number of users to share CAD software on a network, in which case each license is shared among all users, rather than for one person to use on his or her own PC. Autodesk charges a one-time license fee for personal licenses and a periodic license fee for commercial licenses. For more information on Autodesk's licensing, please see our CAD Licensing FAQ. Cost of AutoCAD 2020 and Other Autodesk Products AutoCAD 2020 is priced between $200 and $300 depending on the number of features you choose, plus a one-time installation charge. Other Autodesk products, such as the design software Inventor and the animation software Maya, are priced between $60 and $400, while 3ds Max is $5000 per year. For more information on AutoCAD pricing, please see our CAD Pricing, AutoCAD Licenses and CAD Software Pricing FAQ. Licensing AutoCAD 2020 and Other Autodesk Products AutoCAD 2020 is sold on a per-seat basis, and includes 10 licenses for one or two user seat licenses (10-seat and 20-seat). Each seat license is unique and allows one user to use the software at one PC. A new seat license is required for each new user and cannot be shared with other AutoCAD users. AutoCAD Design Web is offered as a perpetual license, in which one license is used for each PC. For more information on Autodesk's licensing, please see our CAD Licensing FAQ. AutoCAD's filter includes a tool called "FilterFind" that can be used to search through and find

objects in the drawing. AutoCAD has the ability to directly edit its own drawings through its own scripting language, AutoLISP. The help system for AutoCAD can be searched and accessed with keyword search, and is accessible by menus and context-sensitive help. AutoCAD also supports several types of vectorization; it can: Vectorize bitmap graphics Vectorize outline graphics Create outlines from imported SVG and other vector files. AutoCAD drawing is a collection of drawings, often using similar techniques and conventions. The convention is to call each drawing a "DWG" (Drawing Workgroup), followed by the number in the order it was created. The DWG in AutoCAD may correspond to one or more DWGs in other CAD systems, where it may be known by a different name. AutoCAD supports several user interface styles, which can be configured for specific operations. For example, the default ribbon design in AutoCAD allows the user to open and save drawings with the mouse. This style is known as "mixed". The "classic" ribbon design, which looks like an old version of Windows 3.1, is more similar to those used in WordPerfect, and is the default in other AutoCAD editions. When designing a complex drawing, designers generally use the "classic" interface style.
