AutoCAD's Markup engine makes it easy to send and receive comments, reviews, and feedback from external clients, other designers, and your team. Any user can quickly send feedback by simply highlighting text in the drawing and pressing Enter. If you receive feedback, simply highlight the text and press Enter again. AutoCAD makes it easy to incorporate feedback directly into your drawing and creates a message in your drawing window when it's ready. (video: 2:13 min.) New toolbars: The new toolbars help you communicate visually with your colleagues, create effective parts lists, and make it easier to add and modify annotation. The new toolbars make it easy to export a drawing for use with DWG2PDF or WMF2PDF; edit annotations in a spreadsheet; create parts lists in a spreadsheet; and make drawing annotations, parts lists, and spreadsheet annotations available as comments in your drawing. Enhanced Part Management: There are new options in the Part Manager to customize the parts list, import drawings from DWG and DWF files, and manage parts. In the new Part Manager, you can quickly identify an exact part by searching for the part number, part description, or drawing name. (video: 2:13 min.) Improved efficiency for working with multiple work groups: Some operations are now available to you as you work with multiple work groups, such as: Copying and pasting parts from other drawings into a drawing. Editing group memberships and changing multiple work group permissions. Organizing groups into subgroups. Activating and deactivating multiple work group permissions. You can now get commands for more efficient working with multiple work groups.
