## What's New In AutoCAD?

How to Customize Elements in a Drawing: Be more productive with custom controls, sizing options, and custom drawings that will automatically fit your space. (video: 1:30 min.) Workaround for AutoCAD 2019 Graphic Issues: AutoCAD 2019 added new features and enhancements to many objects and was a huge leap in all areas of the product. However, there were also some features that were changed or removed. In this post, we'll explain why some objects will not work in older versions of AutoCAD and how you can add an AutoCAD 2019 workaround to get the same functionality. New Features and enhancements: Support for dimensions of 70mm, 120mm, and 150mm (exact). Sizing options based on Shape Height (maximum), Shape Width (maximum), and Corner Radius (exact). Support for negative values for Shape Height and Shape Width. Support for advanced or user-defined datums. Support for Revit components and styles. Support for 3D models on DgnView. Support for INSERT and FOREIGN\_INSERT in Customize. Fully compatible with AutoCAD 2019. There were a number of other improvements and enhancements in AutoCAD 2023. See the release notes for all of the details. Customize: Customize dialog boxes have been reworked to enhance the look and functionality of the dialog box, including: Use of white and black fonts to make the text easier to read. Improved scale bar format. Improved options for drawing and editing elements. Use of better-looking colors for the buttons. Foldouts and tab controls have been improved to match the look of the rest of the product. New functionality in the Customize dialog box: 3D Model import and export: Models from 3D applications can be imported into AutoCAD and saved as 3D components or AutoCAD geometry. The new import dialog allows for easy transfer of 3D models from the 3D applications and automatically attaches them to the selected models. Support for AutoCAD blocks and 3D blocks for the new import format. 3D Models can be exported to AutoCAD. 3D Components can be converted to AutoCAD blocks. User-defined datums:
