What's New in the Coopoint Sound Troubleshooter?

Part of the PowerISO software package. Quite useful, for me, even though I mainly use Windows 7 and not XP. Instructions for Using Coopoint Sound Troubleshooter: 1) Run Coopoint Sound Troubleshooter and follow the on-screen instructions. 2) If you experience problems after installing Coopoint Sound Troubleshooter then restart your computer. 3) When the program is finished, review the software's Help section for further information on what the program does. I am using Coopoint Sound Troubleshooter now, and the resolution that is suggested to my sound card "Soundblaster Live! Value" does not seem to work, even after restarting my computer. Coopoint Sound Troubleshooter is extremely effective and extremely easy to use. I would recommend this application to anyone with a device that has audio problems, or those who are having a hard time with device related problems. Thank you for your excellent software. I did a quick scan of my soundcard and it detected that the ICH7 (SPDIF) was being redirected to the CAS (codec) and that it was set up wrong. Also my sound playback was muted. I also had problems with my headphone being heard but this was easily resolved. Coopoint was very easy to use and I could get the sound working right in less than a minute. Thanks again for a great utility. The following are the steps for using Coopoint Sound Troubleshooter: 1) Run Coopoint Sound Troubleshooter and follow the on-screen instructions. 2) When it asked to install the program, click on the "Install Now" button. 3) You will be prompted for a location to save the updated driver information file. Select "Download", click "OK". 4) When the installation is finished, click "OK" to restart Coopoint Sound Troubleshooter. 5) Coopoint Sound Troubleshooter should now open and present the question "Have you performed a sound driver scan recently? [Yes/No]" You can select "Yes". 6) When Coopoint Sound Troubleshooter is finished scanning your sound devices, select the sound device that needs to be reset/updated. Click "Update Settings". 7) If the problem is resolved, check the "Sound Troubleshooting" section of the software's Help section for
