WebCipher 2007 Free Download

WebCipher enables you to easily create macro definitions for commonly used elements. When you are viewing a page with many common elements that need to be modified, you simply click the corresponding button, select the elements you want to modify and the corresponding macro definition will be inserted. Once you are finished, you can use the "Undo" function to return the element to its previous state.

WebCipher Features:

- ❑ Create and edit XML based macros
- ❑ Display names and images of the macro elements you created
- ❑ Build your own Macros
- ❑ Define your own "macro" name
- ❑ View and edit Macros on any page
- ❑ Automatically check for Macros on a page (useful for "Save as" functionality)
- ❑ View all your created Macros
- ❑ View the Macros on any page
- ❑ Macros cannot be edited
- ❑ Macros are shared between all users
- ❑ Macros are saved in XML format (can be viewed in other XML viewers)
