It's common when I make a tortilla (tortillas are made in a low-sided cast iron skillet) to find that they stick to the pan, and sometimes tear when I try to flip them. It seems to me that the problem must be the flour, since if I use a little bit of water, the tortilla will bounce off in one piece. I know how to prepare them: add enough flour to make a smooth, somewhat stiff dough, then add the liquid and fold to distribute it, like in the picture below. Then after 20 seconds or so of cooking, carefully flip the tortilla onto a plate, and cook from the other side for a few more seconds or so. But why do they stick so much in the first place? A: The one thing that you are missing is the turning of the tortillas after you put them in the pan. The dough is raw and still sticky, so you cannot cook it too early. You want to cook it enough to lock in the steam inside, but not too long as to dry the outside of the tortilla before cooking it off. When cooking tortillas in the pan, you want the heat to hit the tortilla around the rim. After about 3 seconds, turn the tortilla and take the pan off the heat. At this point the bottom of the tortilla should be mostly cooked with only a little bit of dough left. At this point you fold it and put it back in the pan, cooking on the other side for a few more seconds. A: We should start with the phrase "the problem must be the flour". While adding even a small amount of water will make the dough much more "elastic" that will allow it to lift off the pan much more easily. But, I don't think that is the only problem. When you add water to the dough you are adding energy. This means that as the dough pulls and stretches in an attempt to expand into its true shape the energy is then expended to lock that into shape. This takes more work (actually, it's the dissipation of energy). This will not happen if the dough is completely packed, and if the water is added between the two flour layers.

Bumrah got his name into the limelight during the IPL last year when he took five wickets in six balls in the first qualifier against Chennai Super Kings. He picked up two wickets in the first innings, one in the second and another one in the fifth. While Royals were forced to chase 176 in 20 overs in their first knock, Mumbai Indians were set a target of 156 in 22 overs after they put up a commendable first innings batting performance of 113 runs. Jasprit Bumrah took five wickets in 6 balls in Nagpur in 2015 (Image: PTI) He ended the innings by bowling out Royals for 116 runs in 19.1 overs. With his performance, Mumbai Indians managed to reach the Playoffs for the first time in eight years. MI were one of five teams who advanced to the Playoffs from the Super League that was held last week. Chasing a below par total, Royals were struggling in search of a strong start by captain Gautam Gambhir and youngster Ajinkya Rahane. Rahane, the second highest run-getter in the Chennai Super Kings team with 892 runs in 13 matches, soon got his eye on a fifty by scoring 22 runs in 12 balls. While Rahane played well, Gambhir was inconsistent. He hit six boundaries in his first three overs before his struggles worsened, Gambhir hit the same shot in the 7th over by sending a wide in the outfield for 22. Defending 74 in 17.5 overs in the first innings, he fell in the eighth over with a heartbreaking blow for Mumbai Indians as he failed to clear the rope and wicket-keeper Aditya Tare came on to field. Gambhir remained not out in 45 balls facing 86 scoring. Bumrah bowled a wicket maiden over to remove Gambhir for 43. Siddharth Kaul, who replaced Gambhir, struggled in his 1cb139a0ed
