freoneclickrootactivationkey I have a problem with my file in /USR/LOCALS 0Y™ it says it's not fully installed so I thought it might be because I installed it to disk and I did it again, it didn't work. I also did it again, but already uploaded, I don't know what else to do, please help me. I also did it with sudo apt-get update and sudo apt-get install lpkg-deb but it didn't work, if i installed it again it says there is an error.
