Personal project management software In January 2013, Autodesk released Project 2016 for Windows, an enterprise project management software. A key feature of the new software is a component that automatically sends email to registered recipients when a task or milestone is completed. With this new feature, members of a project team are able to stay informed about a project's status and

resolve issues as they arise, rather than waiting until they return to their desk. The software is available free of charge to all Autodesk users and is a first step in Autodesk's plans to create a single platform for software development and software usage. In March 2014 Autodesk released the public version of the software with the same name but with a new user interface. Sandstorm cloud application delivery service In July 2017, Autodesk launched a cloud-based application development environment called Sandstorm for providing enterprise applications to customers. Sandstorm enables developers to build, package, and deploy mobile, desktop, and cloud applications on Autodesk applications and services. The applications are delivered in either the cloud or a private cluster.
