The relationship between ductal breast disease and subsequent carcinoma of the breast was investigated using a series of women attending a breast disease clinic who subsequently developed breast carcinoma. All benign breast disease diagnosed during follow-up and invasive carcinomas were identified prospectively in a series of 182 women attending the Bristol Royal Infirmary with a benign breast condition at the time of diagnosis. Using the Prognostic Index (PI) as a measure of the degree of risk inherent in the breast disease, a subsequent breast carcinoma developed in only 2.8% of the 182 women (5 of 179) after a mean follow-up of 3.4 years. The women with a low PI score of Q: Does a Photo Gallery/album have to be protected? My client wants to have their images and videos in a gallery or album displayed online and shared. They do not want the images to be downloaded. How does one achieve this? I would assume the images (along with their images) need to be have a watermark or similar protection placed on them (to prevent their images from being downloaded). Is this correct? Also, if I want to make it REALLY safe, can I use the jpg or.png jpeg compression values (i.e., %40) to protect my images? I think I can't do that -- would it be best to use a bigger % than
