The three basic actions (STUN, DASH, and RAPID RUN) function in a similar way to traditional action games. There is no system of activity, no button for going left or right, and no button for jumping or climbing. The player will be able to move freely and fight enemies as they please. By using a combination of actions together with the various moves you have learned, you can take the enemy off balance. It is possible to play as a character with high attack power, high defense power, or to use the moves of a wide variety of units, combining them to fight. RUN "DASH" STUN "STOP" PVP Direct attacks and strategies vary depending on the situation. The mechanism of the match is open. You can play as one of the three main characters or as an accessory character. CONCEPT A Vast World of Adventure In the world of Elden Ring there are various Vast World™ and various units. The Vast World (landscape) is vast enough to accommodate all the units, allowing for exploration while allowing the enemy to retreat from the battlefield at any time. Local Field The environment can change at any time. There are huge dungeons containing secret pathways, traps, and other elements that are invisible. Moves Different moves can be used to cross the terrain, and opponents can be attacked while crossing over into other parts of the map.
