I've set up an SQL Server database project in Visual Studio 2012. I'd like to use this project to build code that uses that database project - however I'm very confused as to what version of Visual Studio the project was created in and what version of SSDT the database project is based on. A: If you right click on your database project, you can see a version history, including the version of VS and SSDT used to create that database. /* This Source Code Form is subject to the terms of the Mozilla Public * License, v. 2.0.
