Punch Bomb is a game studio that makes games for everyone. Our titles are available on Windows, Mac, Linux, Android, iOS and more! We are a team of 4 people led by David Foisy, who graduated with a Bachelor in Software Engineering at the baccalaureate, the french national math contest in July 2016. He wanted to become an independent game developer, but took part of a game jam in fall 2016 with a goal to work on a game every week, get it finished in just 2 weeks. 6 months later, he is fully independent! "I'm not sure if you've heard of them, but game jams are tournaments held regularly to get people to make games in just a few days, with no deadlines and a lot of fun!" -David Foisy, (studio Punch Bomb) The game is made using Unity3D, SceneKit, SpriteKit, Cocos2d, Cpp coroutines, Swift coroutines, and lots of OpenGL. It's a 2D puzzle game that will challenge your mind and unblock your code without getting bugged by one of your teammates. *Disclaimer* The game and its characters are as much a satire on the game development industry as they are on game jams!
