torrentBuilding the case for an amalgamated Canada When I was in medical school, much of the learning was derived from the clinical experience of my residents. And one thing that I'd been told over and over again during the training program was that we needed to remember "what it's like to be normal." My newness to adulthood could be used as a crutch, I was told, since it would prevent me from making any irrational decisions. I was encouraged to take the time to experience the standard of care and to practice empathy, providing patient care that I would be proud to have as a doctor. The lessons of the first two years were reinforced in the last two years of residency. The real world was my hardest test. It wasn't the physical workplace I was struggling with. It was the emotional workplace, a world where I was expected to provide a template for everything from providing emotional support to caring for people, by using only my mind. And I was human. Maybe not all of the time, but most of the time. No, the problem was a feeling of falling short of someone else's expectations, despite my earnest best efforts to learn to be just as good as them. In the world of medicine, it didn't matter whether I was a man or a woman. It didn't matter if I was white or black, or of a particular religious faith. My training gave me no formal advantage over anyone else. The only difference was a set of pages that I carried in my head, written by my teachers and preceptors. The pages said that I had to deliver care based on the
