Adobe just announced Photoshop 2023, Photoshop Creator, the new mobile app that gives designers on the go access to tools we already have in Photoshop. It's also the first new Photoshop release since the company introduced a philosophy of "mobile first" in 2014. Adobe has made some nice interface improvements to Photoshop CC and Photoshop Elements. The changes reflect a longer-term move towards the mobile 'app-first' direction, rather than just an effort to fix some basic segues that crashed. Still, some issues remain. So, would we recommend new users go with Elements? Probably not.
