playlist from any song in your library or any artist, album, genre, or playlist that you've already created. - Add songs to playlists You're free to add any song in your library to a playlist you've already created. That means if you want to create a list of songs to listen to in the car, or create a playlist of your favorite songs, you're free to add them, and you can even be sure that if you later edit the playlist, the song will still be there. - Create playlists from popular songs Want to create a playlist of your favorite songs? You can. If you like that song, add it to your playlist. - Sync playlists and songs to the cloud If you've added any playlist or song to the cloud, you can continue to use it right in the mSpot Music Player app. Your playlists and songs are just as up-to-date on your mobile device as they are on the cloud, no matter which device you're using. - Copy songs and playlists to your clipboard You can easily save a song to your clipboard, whether that's for later listening, sharing, or both. - Turn off the search music mode You can turn off the music search mode for a more enjoyable experience while listening to your music. - Tap on the song you're listening to and you'll be taken right to the audio player where you can control the volume, skip to the next song, and even add it to your library. - Read music info and lyrics Read your songs' basic information

System Requirements For DC List:

Before we get into it. If you have a Mac, with a mouse & keyboard, you should be fine. & If you have a Windows computer, with a mouse & keyboard, you should be fine. If you want to get into eSports and streaming, you will need a webcam. But if you do, at least in the US you can get one for \$60 & here is a really good guide on how to do it. If you have an old computer, you may need to turn off your anti-v
