Hepatitis C virus (HCV) has become an important problem in worldwide public health due to the increasing incidence of hepatocellular carcinoma, liver transplantation and the development of severe liver disease in patients with human immunodeficiency virus infection. Therapy for patients with chronic hepatitis C has progressed from the use of the interferon alpha monotherapies to combination regimens including interferon alpha, ribavirin and cyclosporine, although most patients are either non-responders or have a sustained virological response. Direct-acting antiviral drugs and pegylated interferon alpha have been added to the existing regimens. OCT OCT stands for Optical Coherence Tomography, a high-resolution, non-invasive imaging technology that can provide cross-sectional images of the eye. The images are made possible by the natural internal reflections of light in the eye, which create a natural reference for the eye

Widomline of a generalised shape, with a . The origins of the Widomline lie in the work of the mathematician George Birkhoff, and the physical chemist Eugene Wigner, who predicted in 1937 that the probability distribution function of the size of a completely random, i.e. an . (1.1) was investigated. They found that it agreed closely with that derived from numerical integration. (1.2) was derived using a linear approximation. We show that this linear approximation is exact up to fourth order, confirming the physical reason for the Widom line; non-extensivity. Slipknot are a five-piece American post-hardcore/grunge band from Long Island, New York. Formed in 1993, the group consists of bassist/vocalist Stone Gossard, guitarist Kirk Hammett, drummer/backing vocalist Matt Cameron, guitarist Michael "Jamie" Balzary, and guitarist Dave Grohl. They began to gain popularity through collaborations with artists such as Nirvana, Soundgarden, and Alice in Chains. Their music incorporates guitar- and bass-driven grunge-pop songs with emotional and in-depth lyrics. Iran shuts down oil tanker in Gulf Reuters Staff 1 Min Read ABOARD THE IRAN-US BOAT OROSJ (Reuters) - Iran has seized a US-flagged oil tanker in the Gulf after two separate attacks on a Saudi oil tanker in recent weeks and one of two British-flagged tankers - Royal St George - which it seized on July 4. Royal St George. REUTERS/Phil Noble The United States says Iran has been ramping up to seize international shipping in the Gulf, but Tehran has said all of its actions are in self-defense. State TV reported on Friday the crew of the St George, which was heading toward the Gulf, had been detained and were currently being held in Iranian custody. A Royal Navy spokesperson was not immediately available to comment. Video footage taken by the crew of the ship showed several uniformed Iranians, some with assault rifles, taking a group of crew members, wearing orange jumpsuits and handcuffs, into a building. State TV also reported on Friday that the Iranian Revolutionary Guards Corps (IRGC) had seized the supply vessel, Oasis of the Seas, off the coast of Iran on Thursday.
