VMware InstallBuilder is the most advanced application for creating and deploying software installation projects. VMware InstallBuilder is an innovative, easy-to-use and comprehensive tool for building, managing and testing CD, DVD and ISO-based installers and validating your product's integrity. With InstallBuilder you can define your desired features and layout in a logical and orderly way and use a graphical interface to create a professional-looking and fully functional installation package in just a few minutes. VMware

InstallBuilder creates installers that are compliant with the latest software distribution standards such as the various Microsoft (MSI, MSU, or MSVOL), Mac OS X Installer, Debian, and the Linux RPM specifications. InstallBuilder can also generate runtimes for Microsoft Windows, Linux and Mac OS X executables. VMware InstallBuilder provides deep support for various MSI-based deployment scenarios including Windows, Mac OS X, and Linux. The application's powerful project wizard includes features that enable you to easily handle all details that surround the project,

such as the deployment of bundled or standalone applications, the creation of required ISO/CD images, and the installation of custom application extensions. VMware InstallBuilder allows you to build your own deployment project or to use the VMware Image Update Utility (VUM) to generate customized images that are compatible with your deployment scenarios. VMware InstallBuilder's powerful project wizard enables you to build your own project, as well as to handle all details surrounding the deployment project such as generating custom ISO/CD images, custom deployment

prerequisites, and registering custom application extensions. Product Features: * Generates Windows, Linux, and Mac OS X installers in a few easy steps, * Provides information about your deployment and produces a build log, * Supports multiple platforms and operating systems including Windows, Mac OS X, and Linux, * Can be used for both desktop and server based applications.
