Q: Multithreaded C program incorrect output I have trouble with the following multithreaded C code. I try to count concurrences of the same numbers as the numbers I input. I understand the threads part and the output part. But the output is incorrect. When I input 1,2,1 the correct output should be 2. But the output it always 1,1,1. How can I fix this?

```
#include #include #include int i; void *print_conc(void *d) { i++; printf("the number in thread %d is %d ", *(int*)d, i); return NULL; } int main(void) { int counter; counter = 0; pthread_t thread; pthread_create(&thread, NULL, &print_conc, &counter); int s; int i; printf("please input numbers sequentially "); for (s=1; s<=10; ++s) { i=0; printf("s %d ", s); scanf("%d", &i); pthread_join(thread, NULL); if (i == counter) { printf("concurrences is %d ",
```
